

California Exotic Fruit Fly Project  
Issue With QC Master Permit 1321

Cooperative Exotic Fruit Fly Quarantine Project  
**Exhibit – GA**

**Grower Requirements for Hass Avocados (Inside Mexican Fruit Fly Quarantine Area)**

Grove sanitation and safeguarding requirements:

1. Movement requires field boxes or bins that are clean, free of dirt and debris.
2. A field record with grower name and grove location or another project approved field record is required for traceability.
3. Fruit must be transported to the packing house the same day it is harvested, otherwise fruit left in the grove must be protected from fruit fly infestation until moved. Fruit must be safeguarded from fruit fly infestations during movement from the orchard to the packinghouse.

Safeguarding measures include:

- i. Screening bin/container openings with a screen mesh of not more than 1.6 mm or by some other barrier that prevents insects from entering the bins **or**
  - ii. Placing bins inside an enclosed structure/vehicle **or**
  - iii. Any other project approved safeguarding measures (describe in special instructions section below).
4. Hass avocado fruit that has fallen from the trees to the ground, cannot be included in field boxes or bins of fruit to be packed for shipping.
